1. The minutes of the 57th meeting were approved with the following changes: (a) [REDACTED] requested placing Radio Mosul in quotation marks to indicate an assumed rather than a true identity in location of the station. (b) [REDACTED] requested replacing the last two sentences of paragraph 3 on page 2 with the following: [REDACTED] explained that the preparatory committees were composed of representatives of communications industries, the FCC representing all civil users, and federal government users comparable to IRAC membership. The U.S. proposals have been forwarded to the ITU Secretariat for publication."

2. [REDACTED] reported that [REDACTED] committee had submitted to the Chairman a draft of a Staff Study on Agency intelligence support to the Administrative Radio Conference (ARC) in Geneva, Switzerland, August 1959. The Chairman presented a letter from the State Department to the DCI in 1956 requesting Agency participation in the preparatory work for the ARC, and a reply designating an Agency representative to work with State. A discussion followed on an interpretation of the letter as to the role of the Agency in the ARC. The Chairman summed up the discussion by saying the work of the preparatory committees, both U.S. and Soviet had been submitted to the ITU, but that intelligence implications of these proposals and the Agency interest in the conference should be called to the attention of the DCI in order to provide for the Agency support to the delegation and possible [REDACTED] through an agreement with the State Department. The Chairman offered to prepare a new draft of IOTAC Staff Study on intelligence aspects on the problem.
